Lua Brew Technology

Bean-to-cup quality

The Lua features CoEx XL technology with a “barista twist” that includes optimal coffee extraction for consistent coffee quality in every cup served.

Fontana® Syrups

Elevate your flavor experience with a variety of delicious Fontana® syrups like vanilla, sugar-free vanilla, classic, and caramel.

Sustainability & Starbucks

The cornerstone of Starbucks ethical sourcing approach to buying coffee is Coffee and Farmer Equity (C.A.F.E.) Practices, which was one of the coffee industry's first set of ethical sourcing standards when it launched in 2004.

AN ECO-FRIENDLY SELF-SERVE OPTION

The Lua coffee machine is designed using high-quality and partly recycled sustainable materials. This ensures the machine is easy to repair, refurbish and recycle, reducing its environmental impact throughout its lifecycle.

Additional energy-saving benefits can be accessed through the machine's programming, including an adaptive energy-saving mode.

With the power of Starbucks sustainability initiatives and the Lua's eco-friendly features, you can feel good about bringing this self-serve espresso option to your location.

An effortless coffee experience awaits

Contact your Nestlé Professional Solutions or G&J Marketing Representative to get started with your order. The Lua coffee machine must be purchased through de Jong DUKE.
